

Sprint 7 – Documentation

Student Information

Integrity Policy: All university integrity and class syllabus policies have been followed. I have neither given, nor received, nor have I tolerated others' use of unauthorized aid.

I understand and followed these policies: Yes No

Name:

Date:

Submission Details

Final **Changelist** number:

Verified build: Yes No

Required Configurations:

YouTubeLink:

Discussion (What did you learn):

Verify Builds

- Follow the Piazza procedure on submission
 - Verify your submission compiles and works at the changelist number.
- Verify that only MINIMUM files are submitted
 - No – Generated files
 - *.pdb, *.suo, *.sdf, *.user, *.obj, *.exe, *.log, *.pdb, *.db, *.user
 - Anything that is generated by the compiler should not be included
 - No – Generated directories
 - /Debug, /Release, /Log, /ipch, /.vs
- Typical files project files that are required
 - *.sln, *.csproj, *.cs,
 - App.config, AssemblyInfo.cs, CleanMe.bat
 - Resources Directory:
 - *.tga, *.dll, *.wav, *.gls, *.azul

Standard Rules

Submit multiple times to Perforce

- Submit your work as you go to perforce several times
 - Design Patterns – no minimum
 - Sprints – minimum of 5 real submissions (generally 10+)
 - As soon as you get something working, submit to perforce
 - Have reasonable check-in comments
 - Points will be deducted if minimum is not reached

Submission Report

- Fill out the submission Report
 - No report, no grade

Code and project needs to compile and run

- Make sure that your program compiles and runs
 - Warning level 4
 - NO Warnings or ERRORS
 - Your code should be squeaky clean.
 - Code needs to work “as-is”.
 - No modifications to files or deleting files necessary to compile or run.
 - All your code must compile from perforce with no modifications.
 - Otherwise it's a 0, no exceptions

Project needs to run to completion

- If it crashes for any reason...
 - It will not be graded and you get a 0

No Containers

- Containers (No automatic containers or arrays)
- Template or generic parameters
- No arrays
- You need to do this the old fashion way - **YOU EARNED IT**

Leave Project Settings

- Do NOT change the project or warning level
 - Any changing of level or suppression of warnings is an integrity issue

Simple C#

- No .Net
- We are using the basics
 - Types:
 - Class, Structs, intrinsic types (int, float, bool, etc...)
 - NO arrays allowed!
 - Basics language features
 - Inheritance, methods, abstract, virtual, etc...

No Debug code or files disabled

- Make sure the program has only active code
 - If you added debug code or commented out code,
 - please return to code to active state or remove it

Adding files to this project

- Make sure you add the files in the appropriate sub-directories
- Make sure any new files are successfully integrated into the project
- Make sure your new files are submitted to Perforce

Due Dates

- See Piazza for due date and time
- Submit program perforce in your student directory assignment supplied.
- Fill out your this **Submission Report** and commit to perforce
 - **ONLY** use Adobe Reader to fill out form, all others will be rejected.
 - Fill out the form and discussion for full credit.

Goals

- Is your design document good?
 - Get some feedback now... before its due

Assignments

Grading:

- **Design Paper:**
 - Write a **2 FULL pages** - paper design pattern for feedback
 - [Write about the Proxy Pattern](#)
 - See description below

Required Features:

Paper: Design Document... suggestions ([Write about the Proxy Pattern](#))

- Just make sure each problem/pattern answers a set of questions

For example:

- A. **State a challenge** in our Space Invader's Game (a paragraph)
 - Problem:
 - We had the problem of moving the objects together. blah blah blah
 - Solution:
 - A collection of objects needed to move in unison, to treat the 55 aliens as a collection I used a Composite pattern
- B. **Pattern description**..... (1-2 paragraph)
 - Intent - what does the pattern solve... why is it useful
 - UML - simplified (don't show too much) of the pattern YOU used...
 - (not from the internet)
 - **NO BLACK background** – FIX it your is Black or Dark
 - Use class view (export as PNG, and cut and paste that into document)
 - Keep it small 1/2 page
 - Do not show ALL the variables or the complete UML of the game
 - Only the portion that is related to the pattern
 - Need to see YOUR pattern the one actually used in your application
 - Not the Internet's
 - The UML from Visual Studio is good enough
- C. **Key Object Oriented mechanics**
 - How this pattern accomplishes the job is.... (1-2 paragraphs)
 - What's the Object Orient mechanics...
 - How is the accomplished
- D. **How it is used in Space Invaders**.... (1-2 paragraphs)
 - Describe the uses in the space invaders game...

- Talk to me in the document
 - Pretend you are speaking to me

This is for you...

Create Diagrams

- UML for all the systems
 - Doesn't have to be perfect UMLs
 - The class view diagram in Visual Studio is good
- Use the UML to prototype

Development

- Store project in student directory in perforce
- Place your PDF in the Sprint5 directory
 - Work on the document here.
 - Call it SampleDesignDoc.pdf

Submission

- Submit your Sprint5 directory into perforce:
 - /student/<yourname>/Sprint5/...
- Fill out the Submission report and submit that pdf to your student directory

Validation

Simple checklist to make sure that everything is submitted correctly

- DNA

Hints

Most assignments will have hints in a section like this.
